Abstract of the Disclosure

A device and method for measuring the iridocorneal angle including: a light source (14) designed to reveal the differences of contrast in an image; image capture unit (10); and image processing system (22) connected to the image capture unit (10). The image processing system (22) receives an image of the eye captured by the image capture unit (10) and supplies in output a value of the iridocorneal angle, the value being obtained based on the analysis of the contrast differences in the image.
